# Risk Assessment of The Office of Shared Accountability at SCSD

By Rajith Jayadevan, Pratyush Kulwal, Pradeep Raja, Ruchi Shah, and Jamar Smith

#### Agenda

- Syracuse City School District and Office of Shared Accountability
- Organizational Structure
- Current Risk Management (Old Paradigm)
- Risk Infrastructure
- Risk Identification Methods
- Measurement of OSA Risks
- Risk Management, Contingency Plan, Disaster Recovery for top 5 Risks
- Enterprise Risk Management (New Paradigm)

#### About OSA and SCSD

#### **Syracuse City School District**

- 5 high schools, 8 middle schools, 14 elementary schools, 6 K-8 schools, 3 alternative schools and 3 other campuses
- Great Schools ranks it number 3 out of 10
- Say Yes to Education Program

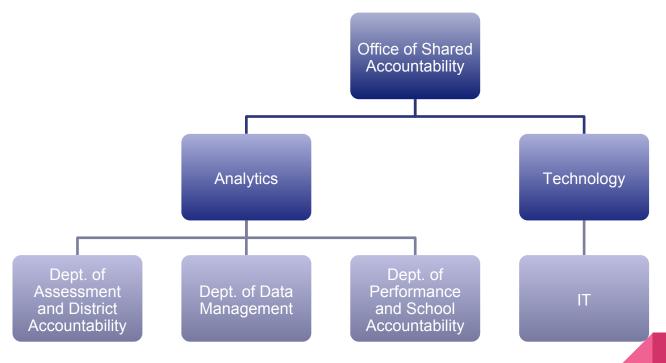

#### Office of Shared Accountability

The office is responsible for:

- Collecting state, district, and school level data
- Organizing, maintain, and control the data
- Generating state and district reports
- Maintaining state testing guidelines
- Testing audits
- Program evaluation

#### **Organizational Structure**

# OSA Risk Culture (Old Paradigm)

Fragmented – Managing risks in a disparate and compartmentalized form

Ad Hoc – Managing risks only when risk event take place and not considering wider application

Narrowly Focused – Managing risks only specific risks and not managing risks associated with entire office

#### **OSA Risk Infrastructure**

#### SCSD

- The district are responsible for developing and implementing risk management
- The district has developed risk management policies that OSA need to know and follow

#### OSA

- The Director and management manage risk when an event takes place
  - There are some policies in place, but OSA manages risk as needed

#### **ERM Process: Risk Identification**

- Interview (Staff members roles where Senior Data Analyst, Data Analyst, Research Tech 2, and Assistant Director)
- SWOT Analysis
- Brainstorming
- Industry Analysis
- Delphi Technique

# Risks Identified using Interview

- Sending confidential information through emails
- Not having a backup if testing scanners go out of order
- No natural disaster plan drills except for fire
- High level employees with passwords written within site of unauthorized users
- Neighborhoods are not safe (shootings and thief)
- Mismatch in data and reporting between OSA and third parties
- No work from home when the office is not reachable
- Illness within the office with multiple absence
- Exam Proctors not trained properly for Regents
- Regulation impact on APPR teacher evaluations
- No standardized training when a new employee starts

# **SWOT Analysis**

#### **STRENGTHS**

- High quality staff
- Good Leadership Skills
- Financial strength & stability

#### **OPPORTUNITIES**

- Going digital
- Improve schools & students performance

#### **WEAKNESSES**

- Data unification
- Coordination between departments
- Manual processes
- Lack of verification process
- Lack of training
- Lack of cross training
- APPR teacher Evaluations

#### **THREATS**

- Data breach
- Funding
- Competition with Big 5 districts
- FERPA compliance

# Risks Identified using SWOT Analysis

- Verification or Review process of the data
- Cross training
- Data breach
- Misreporting or having inaccurate data
- Operating budget
- Staff efficiency
- Leadership
- Student Performance
- Integrating test into Digital environment
- APPR teacher evaluation
- FERPA Compliance

# Risks Identified using Brainstorming

- People following or tailgating into the office
- No alternative work site if office is not operational
- Lack of training on data tools for end users

# Risks Identified using Industry Analysis

- FERPA non-compliance when reporting or in data handling
- Change in political party and political beliefs towards education
- Competition within Big 5 Districts

# Risks Identified using Delphi Technique

- Information security practices not standardized within the department
- Superintendent can make any request urgent that disrupts operation flow
- Mismanaging a lot of Paper based test
- Not good at customer service
- No communication of district strategy from school board to all departments

#### List of Risks

- Sending confidential information through emails
- Information security practices not standardized within the department
- Not having a backup if testing scanners go out of order
- Lack of verification or Review process of the data
- No cross training (Man down then there is a gap)
- Superintendent can make any request urgent that disrupts operation flow
- Data breach
- No natural disaster plan drills except for fire
- FERPA non-compliance when reporting or in data handling
- High level employees with passwords written within site of unauthorized users
- Mismanaging a lot of Paper based test
- Neighborhoods are not safe (shootings and thief)
- No data standardization or unification within the database when analyzing for reporting
- People following or tailgating into the office
- No alternative work site if office is not operational

- Misreporting or having inaccurate data
- Mismatch in data and reporting between OSA and third parties
- No work from home when the office is not reachable
- Not good at customer service
- Reduced operating budget
- Illness within the office with multiple absence
- Exam Proctors not trained properly for Regents
- Non communication of district strategy from school board to all departments
- Regulation impact on APPR teacher evaluations
- No standardized training when a new employee starts
- Lack of training on data tools for end users
- Change in political party and political beliefs towards education
- Competition within Big 5 Districts
- Unqualified staff and low performance from staff
- Lack of leadership or clear direction from management
- Integrating the test into a digital environment
- Improper program evaluation of district performance

# Risk Measurement - Heat Map

| Information security practices not standardized within the department  Not having a backup if testing scanners go out of order  Lack of verification or Review process of the data when in a tight deadline | Integrating the test into a digital environement   | non-co<br>when i<br>or in d                    |          | when reporting or in data handling fire handling fire of the fire or having inaccurate data |                           | er plan<br>xcept for                                      | High level<br>employees<br>with<br>passwords<br>written within<br>site of<br>unautorized<br>users |  |
|---|--|--|----------|---|---------------------------|---|---|--|
|   | A member from the team unable to perform task or duties due to external factors (Hospital, Accident, etc.) |  |          |   |                           | No<br>contingency<br>plan if office<br>not<br>operational |   |  |
|   | Sending confidential information through emails  | No data standard                               | dization | Mismatch<br>data and<br>reporting<br>between<br>OSA and<br>third part                       | fro<br>wh<br>off<br>I re: | o work<br>om home<br>hen the<br>fice is not<br>achable    | Not good at customer service  |  |
|   | Superintendent can make any request urgent that disrupts operation flow                                    | People following or tailgating into the office |          | Reduced operating bud   |                           | get Proctor<br>not<br>trained<br>propert                  | office with multiple  |  |
|   | argent man distribute operation non  |  |          | Communication of district strategy from school board  |                           | for   |   |  |

#### Risk Measurement - Quantitative - Probability and Impact

| Risks  | Probability | Impact | Pl <sup>2</sup> |
|--|-------------|--------|-----------------|
| Information security practices not standardized within the department                                      | 4           | 6      | 144             |
| Not having a backup if testing scanners go out of order  | 4           | 5      | 100             |
| Lack of verification or<br>Review process of the data  | 5           | 4      | 80              |
| Integrating the test into a digital environment  | 3           | 5      | 75              |
| A member from the team unable to perform task or duties due to external factors (Hospital, Accident, etc.) | 2           | 6      | 72              |

#### For Probability

| Score | Significance |
|-------|--------------|
| 1     | Very Low     |
| 2     | Low          |
| 3     | Medium       |
| 4     | High         |
| 5     | Very High    |

#### For Impact

| Score | Significance |  |  |
|-------|--------------|--|--|
| 1     | Very Low     |  |  |
| 2     | Low          |  |  |
| 3     | Medium       |  |  |
| 4     | Medium High  |  |  |
| 5     | High         |  |  |
| 6     | Very High    |  |  |

#### Top 5 Risks

- 1.Information security practices not standardized within the department
- 2. Not having a backup if testing scanners go out of order
- 3. Verification or Review process of the data
- 4.Integrating test in the digital environment
- 5. A member from the team unable to perform task or duties due to external factors (Hospital, Accident, etc.)

# Risk 1: Information Security Practices not Standardized within Department

#### Risk Management

- IT and Analytics Division manager should develop and implement standard Information Security policies
- All employees should be trained on security

#### Contingency Plan

- Identify the cause of breach and stop any data leaving network
- Revoke access to all that are not needed for operations to continue

- Identify data that may have been exposed and report.
- Secure all networks and databases
- Provide training from lessons learned

# Risk 2: No Backup for Test Scoring Scanner

Risk Management  Maintain a rate that will not overheat the scanner and discontinue scanning for 5 mins every 45 minutes

• Maintain appropriate schedule of preventative maintenance

Contingency Plan • Begin manual scoring when the scanner is down

 Identify staff that can be called to assists in manual scoring when scanner is down

- Contact appropriate vendor or individuals for repair of machine to status prior to when the machine was not working
- If serious damage to machine, go through process to acquire new scanner for scoring

#### Risk 3: Verification or Review Process of the Data

#### Risk Management

- Implement a verification process, manual or automated to avoid misreporting of data
- Include data quality checks

#### Contingency Plan

- Send an email to the respective school notifying the problem
- Bring the specific page down which has the issue and rest of the website

- Involve third party website vendor, Skedula data tools to make necessary changes
- Ensure all pages in website are accessible and error free

# Risk 4: Integrating Test into Digital Environment

Risk Management Create a notification system when there is a possible server issue

Invest on backup network servers and computers

Contingency Plan

 Using backup servers when the primary servers are down or slow

• Shift students to a new computer

Disaster Recovery

 Contracts for maintaining technical infrastructure which should recover primary server within a stipulated time

# Risk 5: A member from the team unable to perform task or duties due to external factors (Hospital, Accident, etc.)

Risk Management

- Have critical health care service plans, support employees
- Implement Technology that enables employees work from home or during travel

Contingency Plan

- Succession plans in place for critical management roles
- Execute job cross-training to fill staffing gaps
- Develop communication plans for new restructured teams to keep business running

- Hire new employees to fill the position
- Provide quick trainings to new employees to start their job

# ERM (New Paradigm)/Recommendations

Integrated – Risk management that is coordinated within OSA and oversight from management and leadership

Continuous – Risk management with a annual review of current and ongoing processes

Broadly focused – Managing risks across the entire office with each division having clear communications

# Appendix

| 1  | Name Of Risk                                      | Risk Score | Identification     | <b>Probability</b> | •    | ▼ Impac ▼ | ~  | Prioritizing Reason                           |
